

The cosmic project planned a liftoff.
The ship hissed and then blasted off.

4

They got to the space pad. The ship landed
and docked. "We have contact!"

Amusement Parks

An **amusement** park is made for fun! Rides take you around and around, up and down, and in and out. Games let you test your skills and win prizes. Food **vendors** sell all kinds of delicious things you might not find anywhere else, like candy floss.

A Ferris wheel moves more slowly than most rides. But some can take you up higher than the top of a **skyscraper**!

Some amusement parks move from place to place. When rides can be packed up and moved, we sometimes call it a **fair**.

A roller coaster is like a small train on a track that turns and goes up and down. Some even go in loops!

Glossary

amusement: fun or entertainment

fair: a group of rides, vendors, and games that moves from place to place

skyscraper: a building with many storeys

vendor: a person who sells things
