

## Directions: Regular Play

1. Place nine cards face down on the table in front of the student(s). (Make sure there is one card representing each of the nine different shapes: square, heart, diamond, circle, triangle, rectangle, octagon, star, and oval.)

2. Let a student roll the double dice.
3. The student determines the shape on the outer die and turns over the corresponding card.
4. The student determines the number on the inner die and reads (or listens as you read) the corresponding question or statement.
5. The student responds.
6. A token can be given for reinforcement for a correct answer (optional).
7. The card is returned face down to its original place on the table.
8. The next student rolls the double dice.
9. This continues until all tokens are given out or time runs out.
