List of Reproducible Forms ............................................................................................................................ ix
Foreword by Marcia Gentry ................................................................................................................................ xi
Introduction ......................................................................................................................................................... 1

**Chapter 1: Giftedness Defined in Diverse Groups** .............................................................................. 4
  - Definition of Gifts and Talents .................................................................................................................. 4
  - Identifying Giftedness Across Cultural, Linguistic, and Socioeconomic Communities ...................... 7
  - Twice-Exceptional Learners: Gifted Students with Learning or Behavior Challenges ........................ 10
  - Chapter Summary .................................................................................................................................. 13

**Chapter 2: Using Brain Research to Improve Differentiation** ...................................................... 14
  - Brain Research and Giftedness ............................................................................................................... 14
  - Putting the Research to Practice ........................................................................................................... 17
  - Chapter Summary .................................................................................................................................. 27

**Chapter 3: The Common Core State Standards and Gifted Education** ........................................ 28
  - How Common Core State Standards Affect Gifted Students ............................................................... 28
  - Responding to the Common Core .......................................................................................................... 30
  - Considerations in Reframing Curriculum for Gifted Students ............................................................. 33
  - Chapter Summary .................................................................................................................................. 35

**Chapter 4: Defensible Programs and Services** ................................................................................. 36
  - General Characteristics of Gifted Elementary Students ...................................................................... 36
  - General Characteristics of Gifted Secondary Students ....................................................................... 37
  - Gifted Programming Models .................................................................................................................. 40
  - Effective Grouping Practices within Gifted Program Options ............................................................. 61
  - Chapter Summary .................................................................................................................................. 68

**Chapter 5: Creating Authentic Honors Courses** .............................................................................. 73
  - Articulation: Clearly Defining the Rigors of an Honors Course ............................................................ 73
  - Differentiating an Honors Course ........................................................................................................... 75
  - Alignment: Effective Practices in Student Selection ............................................................................. 90
  - Accountability: Continuous Review for Continuous Improvement ..................................................... 94
  - Chapter Summary .................................................................................................................................. 94
Chapter 6: Changing Roles for Educators of Gifted Students ................................................................. 97
  Defining the Role of the Teacher ........................................................................................................ 97
  Teacher as Mindset Shifter .................................................................................................................. 98
  Teacher as Knowledge Guide .............................................................................................................. 100
  Chapter Summary ............................................................................................................................... 103

Chapter 7: Co-Teaching: A Collaborative Approach to Differentiation .................................................. 104
  The Roles of Classroom Teacher and Gifted Specialist ..................................................................... 104
  Co-Teaching Strategies for Addressing Learning Differences ........................................................... 108
  Co-Planning Lessons for Gifted Learners ......................................................................................... 110
  Chapter Summary ............................................................................................................................... 110

Chapter 8: Understanding and Reversing Underachievement ................................................................. 114
  Defining Underachievement .............................................................................................................. 114
  Factors That Influence Academic Achievement .............................................................................. 115
  Potential Risks for Underachievement .............................................................................................. 116
  Reversing Underachievement ........................................................................................................... 119
  Chapter Summary ............................................................................................................................... 130

Chapter 9: Assessment and the Gifted Learner .................................................................................... 135
  Types of Assessment .......................................................................................................................... 135
  Integrating Assessment into Instruction ............................................................................................ 137
  Using Assessment with Gifted Students ............................................................................................ 139
  Assessment That Builds Autonomy ..................................................................................................... 146
  Chapter Summary ............................................................................................................................... 146

Chapter 10: Leadership ............................................................................................................................ 162
  Gifted Education Specialist: Administrator or Teacher Leader? ....................................................... 162
  Embedding Differentiation for Gifted Learners into Classroom Practice ........................................ 163
  Instructional Coaching ....................................................................................................................... 172
  Lesson Study ....................................................................................................................................... 177
  Chapter Summary ............................................................................................................................... 179

Chapter 11: Next Steps ............................................................................................................................. 195

References and Resources .................................................................................................................... 200
