## Introduction

The ability to ask and answer WH questions is important for a developing communicator. *Webber® WH Photo Cards* targets both receptive and expressive WH questions. Each card includes a photo and a 2-3 sentence story. Also included are WH questions Who, What, When, Where, and Why— 5 receptive WH questions and 5 expressive WH questions on each card.

Receptive questions target the student's ability to recall information from the 2-3 sentence story. Expressive questions encourage students to generate novel responses based solely on the picture. Work on answering receptive and expressive WH questions, auditory memory, question-asking skills, generating narratives, and more!
