Practise letter formation in the air, in wet sand, on sandpaper letters before writing them on paper.

Ask child to put a spot on where to start the letter for the whole line before beginning to write.

Doing this will help the child to focus on where to start writing.

Right handers slant their paper towards the left, left handers slant their paper towards the right.

The arrow points to where to start.

Ask child to whisper the sound as he/she writes it.

Do one sound a day for writing with young children.
