Message to Teachers

"Let's Write" includes fifteen activities designed to accompany each of the fifteen Level One readers. When reading and writing are taught together during literacy instruction, the benefits are greater. These writing extensions provide an opportunity for children to write about their personal connections to the stories. The activities also give children an outlet to be creative as they express their understanding of the text.

*"Let's Write" was created by Amy Gang to accompany the Whole Phonics™ series.
Amy is a talented kindergarten teacher in a New York City public school.*
