

# Dyed Armpit Hair

Most women in the United States shave their armpits. But some don't. They grow out their armpit hair. Some dye their armpit hair.

Roxie Hunt is a hairdresser. She's from Seattle. She dyed a woman's hair blue. Then she dyed her armpit hair blue. She said, "It was just sort of an **experiment**." Experiments are tests. She took photos. She shared them online. People liked this idea. They stopped shaving. They grew out their armpit hair. They started dyeing it. They dyed it different colors.

*There's a movement called Free Your Pits.*

Some women host "pit-ins." They get together. They dye their armpit hair.
